

Reading the ingredient label:

When reading product ingredient statements, it is important to note that all items contained in the product must be listed. So, a can of kale may declare, "kale, water, and salt," those would then be the only ingredients contained in that product. If a product contains no ingredient list then the only ingredient is the product itself. Orange juice may be an example of this. You may also come across the terms "natural flavors" and/or "artificial flavors" in the ingredient list. Natural flavors may contain gluten. Artificial flavors and spices however, do not contain gluten.

Reading the Meijer brand list:

This list identifies Meijer Brand products that to the best of our knowledge are gluten free and also identifies potential allergens. Meijer works with our vendors and suppliers to investigate the gluten and allergen status of various products. This list does not contain all gluten free products available at Meijer and is supplied only as a guide to assist you in shopping. You should always confirm the status on the label and ingredient statement on the product.
